

QA Engineer assignment

QA Engineer assignment

Implement a sample test harness for Android, containing:

1. Automated GUI tester for the included Universal Music Player APK (uamp.apk).
2. Automated result handling, grouping and visualization.

Full coverage is not expected, but the sample should be extensive enough to demonstrate the principle. Please return the source code, configuration and sample output of the completed assignment for evaluation.

Bonus:

Implement a minimal test application for testing a specific piece of code in the harness.
